

Progress Report

4/4/19

Project Name: Mind Over Matter: Rec Sports

Reporting Period: 2

Work completed this reporting period:

- Research on data visualization tools
- Research on heat mapping
- Draft dashboard for internal Rec Sports reporting/usage (survey data)
- All project documents

Work to complete next reporting period:

- Functional dashboard for internal Rec Sports reporting/usage
- Road map to ensure easy transition to potential next project group

What's going well and why:

- Communication with our project Sponsor
 - We established weekly meetings to ensure constant communication.
 - Maintaining a positive relationship with Sponsor (Megan Hughes)
- Team communication
 - Weekly meetings and clearly established roles
- Research has progressed smoothly

What's not going well and why:

- Change in project Scope after initial research
 - There isn't the infrastructure to support accurate heat mapping right now.
- Research shows some data visualization tools are unavailable to rec sports because of licensing issues.

Suggestions/Issues:

- Establish a strong communication plan early

Project changes:

- Communication were initially not as constant as we would've liked, however, we have turned that around with weekly meetings and have maintained a positive relationship with our sponsor.
- Shifting from gym traffic visualization to analyzing data for Rec Sport's use to report to upper management.
